

# Summit Incident

CA SCU 002548

## Incident Action Plan

Operational Period  
May 25, 2008 0700  
thru  
May 26, 2008 0700

<b>OBJECTIVES</b>	ICS 202	1. INCIDENT NAME <b>SUMMIT</b>	2. DATE PREPARED <b>5/24/08</b>	3. TIME PREPARED 1400
-------------------	---------	-----------------------------------	------------------------------------	--------------------------

4. OPERATIONAL PERIOD (DATE/TIME): 5/25/08 FROM 0700-0700 Hours

5. CONTROL OBJECTIVES FOR THE INCIDENT:

1. Keep fire South of Uvas Creek
2. Keep fire North of Buzzard Lagoon Rd.
3. Keep fire East of Santa Rosalia Mountain.
4. Keep fire West of Mt. Madonna Rd. and Croy Ridge
5. Minimize damage to structures

MANAGEMENT OBJECTIVES FOR THE INCIDENT:

1. Firefighter and Public Safety.
2. Costs commensurate with assets at risk.
3. Minimize impact to watershed where possible.
4. Positive public and cooperating agency contact.

6. WEATHER FORECAST FOR OPERATIONAL PERIOD:

Winds: south 6-12 mph. Slight chance of showers and thunderstorms. Continued cool with high relative humidity.

7. GENERAL/SAFETY MESSAGE:

1. Maintain Situational Awareness
2. Keep Hydrated
3. Poor visibility due to smokey conditions
4. L.C.E.S.
5. Watch for spotting, rolling material and snags
6. Around structures. Watch for powerlines, LPG tanks, septic tanks, etc.
7. Watch for snags and falling trees; post lookouts
8. Narrow roads. Drive with caution. Headlights on at all times.

8. ATTACHMENTS (☒ IF ATTACHED)

- ☒ ORGANIZATION LIST (ICS 203)
- ☒ DIVISION ASSIGNMENT LISTS (ICS 204)

## ***Fire Weather Forecast***

**FORECAST NO:** 3

**NAME OF FIRE:** Summit Fire

**PREDICTION FOR:** 0700 Sunday-0700 Monday

**UNIT:** CA-SCU

**SHIFT DATE:** 5/25/08-5/26/08

**SIGNED:** Ryan Walbrun

**TIME AND DATE**

**FORECAST ISSUED:** 2100 5/24/08

**Incident Meteorologist**

---

**WEATHER DISCUSSION:** Low pressure will continue over the region keeping temperatures well below normal with high relative humidity values. There will be a continued slight chance of a shower or thunderstorm over the Summit Fire...about 5-10%. Wind speeds are expected to be lighter today with southwest winds on the Santa Cruz county side of the fire and southeast winds on the Santa Clara county side of the fire affecting the Division B slope over during the morning hours. However...by afternoon ridge top winds will switch back to west or southwest on all Divisions.

---

### **WEATHER FORECAST TODAY:**

**WEATHER:** Mostly cloudy with a 5-10% chance of showers and thunderstorms.

**HIGH TEMPERATURES:** 48 at 3000 feet. 60 at 1000 feet....little change from yesterday.

**MINIMUM HUMIDITY:** 60-70%...similar to yesterday.

### **20 FT WINDS:**

**RIDGETOP** – Southeast to South 6-12 mph this morning shifting Southwest-West afternoon and evening hours. Gusts to 20 mph possible along Branch I.

**SLOPE/VALLEY** - Upslope 3-7 mph.

**STABILITY/INVERSION:** Ridgeline clouds will likely persist through the day and may limit air operations.

---

**SUNDAY NIGHT FORECAST:** Mostly cloudy with a 5% chance of showers and thunderstorms in the evening. Southwest winds 5-10 mph. RH recovery 80% or greater. Low temperature around 45.

---

**OUTLOOK FOR MONDAY:** Partly cloudy. Southwest ridge top winds 6-12 mph. High temperatures 58-68. Minimum RH values 45-55%

---

**SAFETY MESSAGE:** Review thunderstorm and lightning safety. Consider Posting Lookouts.

**EXTRA INFORMATION:** Please take weather observations! Call them into Communications or bring them back to camp and turn in at the Planning Section. Thank you.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildland
FIRE NAME: Summit	OPERATIONAL PERIOD: 5/25-26/08 0800 to 0800
DATE ISSUED: 5/24/08	TIME ISSUED: 1900 Hours
UNIT: San Mateo/ Santa Cruz Unit Santa Clara Unit	William Baxter  FBAN for ICT4

### INPUTS

**WEATHER SUMMARY:** See *Attached Fire Weather Forecast*

- 5 – 10% Chance of thunderstorms.
- Max Temps 48 at 3000 ft, 60 at 1000 ft.
- Min RH's 60-70%
- 20 Ft. Winds: Ridge tops Out of the SE-S 6-12 MPH in the morning. Shifting to SW-W in afternoon and evening hours. Gusts to 20 MPH along Branch 1
- Slope/valley upslope 3-7 MPH
- No significant inversion / High cloud marine intrusion to persist through the day.
- Night Weather: Min Temps 45, Max RH 80% plus, Ridge top winds SW 5-10 MPH

**GENERAL:** This fire will continue to be fuel-slope driven. Upslope runs to the ridge top are possible when winds and topography are in alignment. Max rate of spread in the timber will be 0.1 to 0.2 MPH with flame lengths 3 - 6 ft with scattered torching. Expect max rate of spread in brush to be 1 to 2 MPH with flame lengths of 10 to 20 feet. Spotting is not expected to be significant since the POI remains at 30%. Excellent RH recovery is expected at night.

There is a 5-10% chance of thunderstorms. The cells within these cloud structures can produce sudden down drafts of 20 to 30 MPH in erratic directions. These down drafts have the potential to increase fire activity significantly. Monitoring thunderstorm build up will be a critical part of situational awareness during this operational period.

The fire made a run up Rattlesnake Gulch in Manzanita with 30 MPH winds in alignment with the canyon and slopped over the ridge in the knob cone pine during the evening of 5/22-24. The fire has been actively burning in the early morning under the marine intrusion; however no significant fire expansion occurred during the day of 5/24. The fire made a few short runs due to wind or topography. Flame lengths of 2 to 8 feet were observed with some torching in the knob cone pine. Spotting was minimal except from rolling material.

**SPECIFIC:** Active burning will once again begin in the early morning under the marine intrusion. . The most critical part of the day will be when winds exceed 15 to 20 MPH. Watch for situations when winds are in alignment with topography. The greatest challenges continue to be where topographic canyons such as Rattlesnake Gulch, Ramsey Gulch and Gamecock Canyon are in alignment with general winds.

- East side and Southwest Flank: This fire has great potential to make runs in the unburned fuels in Ramsey Gulch. Expect backing fires due to rolling material east of Summit Road.
- Bottom of Eureka Canyon to mid slope: Little fire activity is expected due to fire suppression operations except for identified isolated hot spots SE of DP9 and S of DP11.

**AIR OPERATIONS:** The cloud cover from the marine intrusion should persist through-out the day.

### SAFETY

Rapid fire buildup due to potential thunderstorm down drafts will be a watch out situation in all parts of this fire when the cloud buildup exists. The potential for uphill runs below Summit Road in areas of unburnt fuels needs to be expected. Being caught mid-slope during one of these runs is a race that no one can win. LCES is the gold standard that we can all LIVE by.

# **SAFETY MESSAGE**

INCIDENT NAME

**Summit**

Date

Prepared  
05/24/2008

Time

Prepared  
1700

OPERATIONAL PERIOD (DATE/TIME)

05-25-2008 0700-0700

Adhere to the approved traffic plan. KEEP your speeds low and SAFE!!!  
Remember, this applies to the CAMP area also.

STEEP Terrain, watch for rolling rocks and burning debris igniting fire below you.

Be constantly aware of potential spotting ahead of the main fire.

Fire direction may change depending on wind influence and topography.

Dust, low lying smoke and morning fog makes it difficult to see, drive CAREFUL!

Maintain proper footing while working in steep terrain.

Keep Hydrated, consume lots of fluids early and keep drinking throughout the day.

Watch for locals on ATV's and POV's in the fire area.

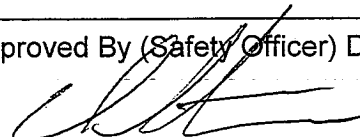

**Snags, Flag and Report and STAY AWAY FROM THEM!**

Remember camp safety and watch out for the squirrel holes.

**Overall- Your situational awareness !**

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown

# SUMMIT – Christmas Hill Base

5-23-08 1830 hours

# Summit Fire Transportation Map

March 25, 2008

## Ingress/Egress to Summit Fire

- Division A and B Ingress:**  
Hwy 152 to Pole Line Road to Summit Road.  
Access to DP-4 and Maymens Flat
- Division A and B Egress:**  
Summit Road to Hwy 17 N to 85 S to 101 S.
- Division D, G, O, X, and Z Ingress:**  
Hwy 152 to Holohan Rd to Airport Blvd to Freedom Blvd to Corralitos Road to Browns Valley and Eureka Canyon Road.  
Access to DP-5, DP-9 and DP-11
- Division D, G, O, X, and Z:**  
Resources at DP-5 (D & G) Egress:  
Hazel Dell Rd. to Mt. Modonna Rd. to Casserly Rd. to Hwy 152 (to Gilroy).  
Division Supervisors:  
Remain until incoming resources arrive.

PLEASE USE THIS MARKED

ROUTE ONLY

**DEMOBILIZATION PLAN - summarized**  
**SUMMIT INCIDENT**

**I. RELEASE PRIORITIES**

The following Release Priorities have been established by the Incident Commander in concert with the Summit ECC.

1. Local Government (other operational areas)
2. Out of state resources
3. Federal resources
4. Santa Clara/ Santa Cruz Local Government
5. Cooperating Agencies
6. Contract and private resources
7. CAL FIRE resources (prioritized by distance and travel time)

**III. GENERAL GUIDELINES**

**A. NO RESOURCES WILL LEAVE UNTIL AUTHORIZED BY THE DEMOB UNIT.**

- B. Efforts will be made to ensure that all released personnel arrive home by 2200.
- C. All government and hired vehicles that were on the line, leaving the incident will have a safety inspection and SOD vehicle wash.
- D. Prior to leaving the Incident the Demob Unit will brief all Supervisors and Strike Team Leaders.
- E. Notification to incident personnel will be by posting surplus releases in advance.
- F. Actual departure times and ETA at destination will be relayed to Expanded Dispatch at time of departure.
- G. A Personal Protective Equipment (PPE) self-sign off (on the Demob 221 form) must be completed by all Cal Fire personnel. Crew Leaders, Strike Team and Task Force Leaders may sign for subordinates under their command. All incident personnel must be accounted for as having serviceable, agency compliant PPE. Defective items may be exchanged in supply.
- H. All Trainees will see the Training Tech Specialist prior to departure.
- I. Maximum driving duration for federal resources will not exceed 10 hours/person/day.

**IV. RESPONSIBILITIES**

Unit Leaders will declare resources excess to their Section Chief. Section Chiefs will declare *excess* resources to the Demob Unit. Include the date and time the resources will be surplus, their position on the incident and any transportation needs. \*\*Use the General Message Form (ICS-213) or Team release form to list all surplus resources. Send to the RESOURCE UNIT.

**V. RELEASE PROCEDURES**

- A. **Functional Heads** (i.e. Section Chiefs and Unit leaders) are responsible for determining resources "Excess" to their needs and submitting the list to the Planning Section. This must be done 24 hours in advance of anticipated release in order to Notify North Ops of planned demobilization and to allow a proactive approach to reassignments or releases to the home units. The lists will provide the following information about the resource:
  1. Order/Request number
  2. Resource name or designator
  3. ETD
  4. Travel time (including rest and meals if necessary)
  5. Destination
  6. Availability for reassignment (if not available, provide valid reason)
  7. If flying, nearest Jetport and Social Security Number
- B. **RESL** will determine if there is a need at the incident that the Excess resource can fill. If no incident reassignments are necessary, the resource will be declared "Surplus" to the incident.
- C. **DMOB** will combine the approved surplus resource lists to create "Pending" resource lists to be submitted to the forest or agency dispatch for confirmation. DMOB will work with the resources and supply units so that the resource status board and resource orders can be kept up to date.
- D. When a resource status has been **confirmed** by dispatch, DMOB will notify the resource so that check-out may begin.
- E. The Crew Leader or individual will take the Demobilization Check-out form to:
  - COML (to confirm that radio equipment is returned)
  - SUPL (to confirm all non-expendable property is returned)
  - GSUL (To inspect, clean and repair vehicles.)
  - TIML (to confirm all time reporting documents are complete)
  - DOCL (to hand in logs or ratings)
- F. DMOB will be the last stop in the release process and:
  - Sign-off, note date and time on the ICS-221
  - Confirm PPE self check off on ICS-221
  - Note any revisions to the ETD or ETA
  - Collect the ICS-221
- G. Resource is **released** and free to leave the incident

**Archaeological and Historical Sites:  
Fireline Guidance for the Summit Incident**

**Do not compromise safety for the protection and preservation of archaeological and historical sites. When possible and prudent:**

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or other projectile points/arrowheads as well as flakes [scatters of obsidian flakes often look like broken glass] and village sites containing dark brown-black soils (midden), artifact scatters and/or scatters of brown ceramic fragments and flat rock outcrops with polished milling surfaces, mortars and/or ovals. These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites in this area include old wooden buildings, structures, old logging equipment, trash dumps with old cans and bottles as well as scatters of old cans, bottles and other refuse.
2. Some of the known sites are marked with red polka dot flagging on a white background or red flagging. Many other sites have not yet been flagged. If you observe artifacts, features, or sites, avoid dozing or driving through and/or parking on these sites, when possible, especially with heavy equipment.
3. If you can't avoid them, attempt to minimize disturbance as much as possible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed by Native Americans in the distant and/or recent past for religious or ceremonial reasons.
5. If new sites are discovered, flag them for visibility and report the location to the Division Supervisor. If possible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Unit so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact CAL FIRE Archaeologist Chuck Whatford at (707) 529-2989 (cell phone). State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.
